

eb#1

AN ENGAGING EVENT EXPERIENCE

eb#1 helps libraries offer an engaging event and room booking experience to staff, patrons, and community members through a responsive and modern design, empowered user options, built-in marketing materials, and a wealth of integration options. Developed by and for librarians to simplify event and room management, it gives library staff the tools they need to successfully orchestrate and advertise their programs to the community.

SIMPLIFY ROOM BOOKING AND EVENT MANAGEMENT:

Integrated Event & Room Management

All-in-one event and room management, integrated to avoid double bookings.

Admin Dashboard

Advanced settings and tools for libraries to set up the policies and processes they want for events and room bookings.

Patron Self-Service

Intuitive, responsive interface with patron login to view bookings, cancel registrations, and rate events.

Effective Event Marketing

Free image library; auto-generated event pages, flyers, and brochures.

KEY FEATURES

eb#1 helps libraries manage the online aspect of the creation, promotion, registration, and delivery of events.

Event Creation & Management

Make event creation easy. Library staff have the freedom and flexibility to create a variety of events (recurring, series, in-person, virtual, etc.), set event details, and publish events to the public website.

Library-Branded Events Calendar

Give your visitors an event website that matches the rest of their library experience. Customize colors and branding, display your featured events in a rotating carousel, and enable patrons to search upcoming events and filter by library location or event category.

Individual Event Pages with Registration

Every event you create automatically receives its own landing page with a persistent URL, which improves SEO rankings and helps your programs show up in search engine results.

Patron Self-Service

When patrons log in with their library account, they can view all of their upcoming events and room bookings in one place, cancel reservations if needed, and rate past events or submit additional feedback.

Room Booking & Management

Program includes room booking functionality where community members can reserve a meeting room or even a special desk or nook. Library staff publish details about the room layout and capacity, and post photos of the space as well.

Program Statistics

Our stats dashboard lets you visualize a summary of programs by top-viewed events, location, or event category. Set your date parameters and export data into Excel for the full details.

Consortia Support

eb#1 can be used by library consortia of any size, either as a single calendar or as separate member instances. Those individual calendars can be combined into an aggregated searchable/filterable list so that members can maintain their own presence while still being broadly discoverable by other patrons served by the consortium. (ETA Q1 2024)

Program Admin

The Program administrative interface is easy to use and gives you access to everything happening in your programs: a dashboard for upcoming events and your most-viewed events, create, edit, or clone events, a calendar view, approvals, room bookings and management, advanced settings, program stats, and an impersonate mode that lets library staff login in as a patron to troubleshoot any issues.

Image Library

Use stunning, high-quality imagery to help market your event through an integrated image library, which gives you access to millions of royalty-free photos.

Auto-generated Event Flyers & Brochures

eb#1 provides a variety of automations to help you market your events: access to the free image library, one-click printable fliers with automated QR codes, a one-click program brochure for all of your event listings, and automated event notifications with the ability to email attendees.

Full API

Our full REST API lets you incorporate program and room booking information on your web pages, blog posts, digital signage, or intranet – anywhere you'd like to see it!

Resource Booking

Manage your library of things, either alongside a room booking or standalone. Allow the public to request and reserve equipment, technology, book kits – anything the library has to offer!

Multilingual

Support your community in their preferred language! eb#1 can support dozens of languages, with the ability for the user to switch between them as needed. From within the staff interface, administrators can change the platform navigation text and other phrases to align with their preferred terminology or dialect.

Solus

Simplify Event Management
